Cook time: +/- 1.5 Minutes per batch. Fry until golden brown

Cooking Instructions:

Small batches are recommended! We find that cooking Intershell's clam strips in about 4 batches (or more) will give you good results without letting the clams stick together or lose their breading as the frying occurs.

1. Heat 3 inches of oil to 350 Degrees F in your home fryer or stove top pan. Use the thermometer to check the oil temperature.
2. Into a 12qt bowl, dump the breading
3. Prop the basket up to one side of the bowl
4. Moisten the clams with water before dropping them into the bowl with the breading.
5. Drop about ¼ of the clams in the breading and carefully - with your fingers – coat the clams with breading making sure all the clams are covered and separate
6. Toss the breaded clams in the basket, and lightly shake the basket with the clams in it to remove the excess breading before frying. ***Make sure the clams are completely coated, separated from one another, and don't get stuck together.***
7. Transfer the 'shaken' clams into the fryer basket and carefully drop them into the 350F frying oil. Cook for approximately 1 minute and 30 seconds until golden brown, remove the clams from the frying oil.
8. Carefully spread the clams on the paper towel lined plate and repeat steps 6 & 7 to cook the rest of clams in 3 more batches. Do your best not to overcook!
9. Serve while hot with tartar sauce, fries, and lemon wedges. You will have a pile of clams for 4 or more, so get to it and have that summer New England taste right at home.
